Analogue Addressable (1-6 Loop)

Vigilon Plus 4 and 6 Loop Panels

The Vigilon Plus range of control panels are available in 4 loop and 6 loop versions. The 4 loop Vigilon has a self contained power supply and battery standby for at least 24 hours and the 6 loop with external batteries will support a system for 72hrs in the event of a mains power failure.

Certified to EN54 parts 2 and 4 Vigilon may be supplied with or without an on-board printer and has a full Qwerty style keyboard allowing full control and management of the system from the panel if required.

Large multi-panel networks accommodating up to 200 devices on each loop and with multipanel networks Vigilon provides a versatile solution for protecting buildings of all sizes.
